Audubon Sales & Service manufactures a line of metal conveyer belts, industrial metal furnace curtains, and metal mesh screens, which are used in manufacturing industries such as heat treating, forging, baking, paper, ceramics, automotive, electronics, and architecture. Located in Feasterville, Pennsylvania, Audubon Sales & Service has seen a steady increase in exports over the last several years.

In 2009, the company credited 20% of sales to exports. It has done business with nearly 50 countries in the Middle East, Oceania, Central and South America, and Europe. In order to cater to customers across languages and time zones, Audubon Sales & Service has streamlined its system by simplifying the inquiry and purchasing processes.

“According to MaryEllen McGrory, sales manager, eliminating trade barriers is not only critical to Audubon’s business, but it also positively affects U.S. business as a whole. Opening trade market for U.S. goods can only increase U.S. productivity and business growth in our country.”
